WORK EXPERIENCE

React Developer

CESA Management Solutions 2020/12 - 2021/05

Project: <https://www.leaderslinked.com>

Migrated a legacy Social Web application written in JQuery to React and used Webpack to bundle and compile the application to integrate it to an existing PHP backend service

Frontend Lead

Availroom SL 2021/06 - present

Projects:

- Availroom OS:

<https://www.availroom.com/productos/pms-vrms>

Led a small team to create a PMS/Channel Manager SaaS product, a web application using React and Redux for state management and we used libraries like Reselect for advanced optimization of the project to display large amounts of data. Created a Nodejs microservice to provide real-time user interactions like figma and implemented CI/CD through github actions for automated project deployment.

- Embeddable Booking Engine:

<https://www.availroom.com/productos/motor-de-reservas>

Created a booking engine with React and we used Webpack for advanced bundling and compiled the application to be embeddable in clients websites, allowing them to use our product to offer their hotels and apartments to the public, we have implemented complex algorithms and data structures to allow multiple renting of a room in a period of time

- Availroom Checkin:

<https://www.availroom.com/productos/app-huesped-availguest>

Developed an web application to allow the customer to "check-in" when renting rooms in a hotel. Implemented an SDK to extract data through photos of documentations such as ID cards, passports and driver's licenses and connected to domotic electronic doors to allow customers to enter their accommodation through the application.

EDUCATIONAL HISTORY

Electronic Engineering in Computation (2015 - 2018)

Yacambú University (Venezuela)

HTML and CSS Advanced Course (2018)

Cadi F1 (Venezuela)

Professional Master in Multi-platform Application Development (2019 - Present)

Master D - Escuela Profesional (Málaga)
