

Jesus Liang

Senior Fullstack Developer

EXPERIENCE

Frontend Lead

Availroom

June 2021 - Present

Led and created a Frontend team, successfully developed multiple projects from scratch to production, such as a booking engine widget where **+3000 bookings are made per month**, a booking check-in web application where **+6000 apartments/hotels are managed** as well as the main product of the company, the PMS/Channel Manager which is **used by +150 hotel and apartment managers**. I have developed from the architecture to the CI/CD system for the automated testing and deployment of all these projects through github actions and configured the server for the proper functioning of them.

React Developer

CESA Management Solutions

December 2020 - May 2021

Successfully migrated a social network project for the students of the academy written in Jquery to React by compiling the project with Webpack for a gradual integration of the project and making the connection from React to the data in an existing backend made in a PHP framework allowing the project to migrate from the monolithic structure.

EDUCATION

Electronic Engineering in Computation

Yacambú University

2015 - 2018

Multiplatform application development

Master D

2019
