Profile

Full-Stack Developer expert in Javascript and TypeScript ecosystem (React/Node.js), microservices, and AI integration. Proven experience leading agile teams, automating CI/CD pipelines, and managing scalable deployments on AWS/Docker.

Skills

- **Javascript**
- **Typescript**
- **React**
- **Nextjs**
- **Nodejs / Express**
- **Zustand / Redux**
- **Vite / Webpack**
- **SQL / NoSQL**
- **REST / GraphQL**
- **Docker**
- **AWS / Cloud**

Experience

CESA Management Solutions December 2020 - May 2021
Web Developer

- **Migration & Decoupling:** Led the migration of a legacy, monolithic student social network from jQuery to a modern React SPA, configuring Webpack for a gradual transition connected to an existing PHP backend.
- *Tech:* React, jQuery, Webpack, PHP (Backend).

Availroom June 2021 - Present

Frontend Developer June 2021 - April 2022

- **Core PMS & Web Apps:** Developed real-time interface components for the core platform serving +150 hotel management groups, and built the frontend for a web-based Check-in app featuring smart home integration for +6,000 properties.
- **Embeddable Widget:** Built a modular, high-performance, white-label booking engine widget injection-ready for third-party websites.
- *Tech:* React, Next.js, TypeScript, REST / GraphQL APIs.

Fullstack Lead Developer April 2022 - Present

- **Leadership, Architecture & DevOps:** Lead an agile team, coordinating full-stack architecture decisions, automated CI/CD pipelines, and scalable production deployments on AWS using Docker.
- **AI Innovation (Chat & PMS):** Designed an end-to-end real-time omnichannel platform and integrated PMS-connected AI agents to automate operational workflows (rates, cleaning), instant translations, and contextual responses.
- **Product Ecosystem (CRM, Mobile & Real-Time):** Led the development from scratch of a strategic CRM powered by predictive market APIs, oversaw the launch of mobile apps, and engineered a real-time collaborative multi-user module (Figma-style) while migrating the core system to microservices.
- *Tech:* Node.js, TypeScript, React, Next.js, GraphQL, OpenAI API, MongoDB, PostgreSQL, AWS, Docker.
